A.D. 1864, 15th *October*. N° 2553.

Composition for Eradicating Corns, &c.

(*This Invention received Provisional Protection only.*)

PROVISIONAL SPECIFICATION left by Thomas Randle at the Office of the Commissioners of Patents, with his Petition, on the 15th October 1864.

I, Thomas Randle, of No. 3, High Street, Hoxton Old Town, in the County of Middlesex, do hereby declare the nature of the said Invention for "A New Preparation or Compound Substance for the Eradication of Corns, Bunions, Worts, and Excrescences of the like Nature on the Feet or Hands," to be as follows:—

A certain mixture forming a composition of crushed glass to powder, one pound; sal ammoniac, half a pound; glue, three ounces; colouring magenta or other colouring dye, six drops; with this composition I form a solid mass, in design round, or square, or oblong, as I deem proper, either with or without handles. The mode of applying the composition is by rubbing the parts affected, and thereby creating friction.
